

Fremont in Action 2019

The Fremont Garden Club was at it again, assisting the Town with a project of removing and replacing three of the Town Line marker signs located on Routes 107 and 111A, as directed by the NH DOT. Garden Club volunteers dug up all the plants within each garden at the signs, and assisted a community service project offered by Stantec Consultants on September 25th. With their help all of the signs were

reinstalled in locations directed by DOT, and plants replaced to be ready for Spring 2020! We appreciate all their help with this important work!

The Fremont Highway Department helped with the heavy equipment work related to removing and re-setting granite posts.
