

Report of the Energy Committee

The Fremont Energy Committee (FEC) has been in existence since 2007. It is an unofficial group that is made up of volunteers. Its purpose is to promote energy efficiency and cost reductions in the public and private use of energy.

In 2013 the FEC met approximately monthly. The FEC focus during 2013 included:

- Review the progress on the implementation of recommendations of past energy audits of public buildings
- Review existing public and private incentives for private energy efficiency improvements with a goal of updated web links and posted information
- Investigate solar electrical generation projects for Towns and School Districts.

In 2014 the FEC expects to update its web page and further pursue the possibility of a public solar electrical generation project.

The Fremont Energy Committee meets for 1 to 2 hours as scheduled, approximately monthly. The FEC is always looking for volunteers. If you have an interest in participating on the Fremont Energy Committee, please contact the Board of Selectmen's Office through Heidi Carlson at FremontTA@comcast.net.

Members: Gene Cordes, Cheryl and Jeff Rowell, Bob Larson, Cindy Crane
